

Raised Storage

Storage areas vary from the simple rack to the fully automated warehouse, but all need to provide the most efficient use of available space. If you are struggling to fit everything in we may be able to save you time, space and even money if the alternative is new premises.

With over 35 years of expertise as a Dexion Storage centre, we can supply and install for you every type of storage equipment available. Our extensive range includes hand loaded shelving, mobile racking, two tier systems, longspan shelving, automated carousels and extremely heavy duty cantilever racking.

Our clients range from corner shops to Multi-nationals, storing everything from individual components to industrial engine blocks and parts for oil rigs.

Additional Office Space

Whether you are moving into a new building or need to upgrade or change your existing offices Stodec can assist in transforming your premises with the minimum of delay and disruption.

If required we can remove existing fittings and replace with new partitions, flooring, ceilings, plumbing, electrics, services and furniture.

We have a wealth of experience in the installation of secure areas, data rooms, conference areas, mobile wall systems, acoustic protection and all ranges of office and archive storage systems.

We offer practical solutions to provide you with an environment that your staff will be happy to work in.

Clean Rooms

Modular Cleanrooms are an increasingly common requirement for modern production processes. Nowadays it is not simply the pharmaceutical and electronics fields that require high levels of filtration and temperature control.

Food production, precision engineering, aerospace, plastic moulding and many other areas are all finding that clean, controllable environments are vital to ensure the quality of their products and to reduce costly failure rates.

For over 30 years we have been designing and installing Cleanrooms and temperature controlled areas throughout the UK and across the world. We can supply simple one room enclosures with ceiling mounted filter boxes up to multi room, split level facilities with interlocks change areas. Soft wall areas can be fitted over production units.

Our services include refurbishing existing facilities to installing new rooms to suit your requirements and incorporate floors, walls, ceilings, lighting, plumbing, ancillary furniture, services and air handling and filtration.

Production Areas

If you have headroom (normally 4.3m or over) then a mezzanine floor over an existing area can significantly increase your production space, without the expense of extending your building or even locating to new premises.

We can also design and install incline conveyors, goods lifts, pallet gates, and automated storage carousels. This ensures that the space is maximized, and materials and finished goods can be simply moved between the mezzanine and ground floor.

Additionally we can supply all types of equipment to optimize the efficiency and safety of the production process. These can include workbenches, storage systems, barrier rails, machine guard systems, steel and mesh partitioning, fire walls and emergency stations and spill pods.

Our range also extends to creating enclosures for CMM rooms, works offices, canteens, sound reduction booths, packing and dispatch areas, secure stores and test facilities.

Free site surveys.

Free designs and quotations.

Fully detailed structural calculations and drawings for Building Regulations and Fire Officer approval.

Assistance with local authority applications.

Complete manufacture & installation, if required, including any associated building work, electrics, plumbing, partitioning, flooring, or storage equipment.

ADDITIONS by STODEC

Mezzanine floors are often just the start of a development plan. We have a wide range of products and systems which can enhance and add value to your working environment

In many cases the mezzanine is just part of the requirement. We also provide partitioning, ceilings, services (including electrics and plumbing), flooring, racking, goods lifts, pallet gates, security mesh, in fact any item you may require to give you a bespoke installation to fully meet your requirements.

Our experienced team are on hand to offer advice from the concept through to project completion.

With over 35 years of experience in the supply and installation of mezzanine floors and project fit outs you can be assured of a first class service however large your project may be.
