## Specialists in the design and construction of environmentally controlled and clean area enclosures

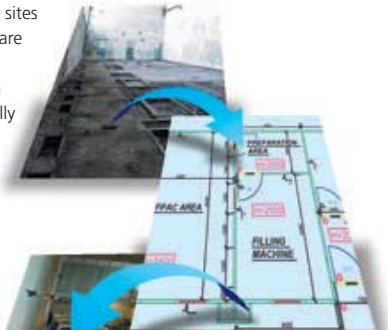

### INCREASING QUALITY DEMANDS

Quality standards and legislation continue to require an increasing range of processes to be carried out in clean, particle free conditions. Research and development, manufacturing, assembly and packaging in many fields, require clean rooms which can be measured to meet appropriate standards and most importantly can be shown to have been designed and constructed to provide and maintain these conditions throughout the useful life of the facility.

### A WEALTH OF EXPERIENCE

During the last twenty years our design and installation experience has included work in various disciplines including Pharmaceutical, Electronic, Precision optical, Plastics manufacture, Computer repair, Medical equipment, Aerospace, Health products and Precision engineering with installations completed throughout the U.K., and at sites worldwide. We are able to supply small, one-room enclosures equally as well as large, multi-process, multi-area facilities.

### SELECT YOUR OWN APPROACH

Clean Room Installation Services Ltd have a wide range of experience in the design, selection of materials, manufacture and installation of clean room fabric and plant. We specialise in creating the most effective and economic enclosures incorporating walls, floors, ceilings, plenum areas, raised access floors, air locks, service voids and any other item which is part of the clean enclosure. We work with specialist air conditioning and filtration suppliers or we can work with your own services specialist contractors or in house staff to provide a complete coordinated installation.

## Economic Clean Room facilities that are designed for you:

WE PROVIDE COMPONENT PARTS OR COMPLETE FACILITIES, OUR SERVICES INCLUDE:

- **Design Advice** Experienced design input at budget stage including appraisal of the proposed location and advice on the most effective solutions.
- **Economic Selection** Consideration of the widest possible range of materials to meet your requirements in the most effective and economic manner, selected from U.K., European and American sources.
- **Quality Control** Materials procurement, manufacture and installation to an agreed plan, carefully controlled and executed to the highest standards of workmanship.

- **Project Control & Implementation** Installation of hardwall or softwall enclosures, a large range of flooring types, various lighting options and filtration systems to meet British, American, European and ISO standards of clean air specification.
- **Widest Range** We are able to offer a range of systems including Fire rating, Food safe, Antistatic, Antibacterial, Glasswall, Insulating, Stainless, HPL in many colour and style variations to suit your environment.

*Clean Room Installation Services are an independent specialist builder - we are not connected with any manufacturer, contractor or design group - our advice is completely independent. The result is the best installation to meet your requirements, constructed with the most economic materials.*

Practical Cleanrooms that work!

## Finance

Clean Room Installation Services Ltd is able to offer lease purchase and flexible finance packages for its customers, this allows the full costs of design, installation and commissioning to be paid over a number of years whilst the facility is being used.

- Flexible finance terms from 2 to 5 years
- Masterlease credit terms – other projects can be added

- You deal with the finance provider direct an all confidential matters
- You control order and installation specification and final approval
- Clear documentation with contracts regulated by the Office of Fair Trading
