

## **CASE STUDY PRÉCIS**

Client: Warburtons / Giles Foods - Specialist Bakery  
Project Type: Maximise storage in Warehouse and New Purpose built Freezer.  
Project Duration / Value: 4 weeks / £40k

### **Project Description:**

Project One: After the acquisition of specialist Bakers Giles Foods by Warburtons, Stodec were asked to survey the existing dry warehouse to maximise pallet storage and create floor space and a safe and efficient working environment.

After working closely with the client, Stodec supplied and installed Dexion P90 Silverline pallet racking within budget and on time. We increased pallet storage from 30 pallets to 236 pallets stored.

Project Two: Warburtons were delighted with the results achieved in the dry warehouse and invited Stodec to propose a storage solution that would maximise pallets stored in the new cold store (freezer).

Stodec supplied and installed within budget and on time 2 blocks of Deepstor P90 Drive-In Racking, creating 320 pallets stored.
